

Fit-Buddy

2. Solution Requirements

Functional Requirements

- Collect User ID, name, age, weight, fitness goal and intensity.
- Generate a structured 7-day workout plan.
- Generate nutrition/recovery advice.
- Store users and plans in SQLite.
- Accept feedback and generate an updated plan.
- Display users/plans through a coach/admin dashboard.

Non-Functional Requirements

- FastAPI-based REST and HTML routes.
- Input validation using Pydantic.
- Reusable modular Python code.
- Local deployment support using Uvicorn.
- Persistent local storage using SQLite.

Prepared from the supplied Fit-Buddy project ZIP and team information. Technical claims are based on the inspected source code and README; no unsupported benchmark numbers are added.
