

Fit-Buddy

5. Code Layout, Readability and Reusability

Structure

The project separates routing, database access, schemas, AI generation, feedback update logic, templates, and test code into dedicated modules.

Reusable Components

- Gemini generator functions
- Nutrition tip generator
- Plan update function
- Database CRUD helpers
- Pydantic schemas
- Jinja2 templates

Quality Notes

Environment variables are used for API keys; requirements are listed in fitbuddy/requirements.txt; README provides setup and testing instructions.

Prepared from the supplied Fit-Buddy project ZIP and team information. Technical claims are based on the inspected source code and README; no unsupported benchmark numbers are added.
