

Fit-Buddy

5. Coding & Solution

Implementation

FastAPI routes accept validated user inputs, call Gemini generation helpers, save results to SQLite, and return rendered pages or JSON responses.

AI Behavior

When an API key/model is available, Gemini is used. The inspected code also contains deterministic fallback generation/tips so core application flows can remain demonstrable without an active Gemini response.

Run Command

```
py -m uvicorn fitbuddy.app.main:app --reload --port 8000
```

Prepared from the supplied Fit-Buddy project ZIP and team information. Technical claims are based on the inspected source code and README; no unsupported benchmark numbers are added.
