

Fit-Buddy

7. Sample Project Documentation

Abstract

Fit-Buddy is an AI-powered fitness planning application that generates personalized 7-day workout routines and nutrition/recovery tips using Google Gemini models. Users can submit feedback to refine their routines, while SQLite stores user and plan information for later review.

Objectives

- Personalize fitness routines using user inputs.
- Provide concise nutrition/recovery guidance.
- Support iterative plan refinement from feedback.
- Provide a simple coach/admin view of stored users and plans.

Technologies

Frontend	HTML, Jinja2 templates, CSS/JS assets
Backend	Python, FastAPI, Uvicorn
Database	SQLite with SQLAlchemy
AI	Google Gemini Models: Gemini 1.5 Pro for workout generation/update; Gemini 1.5 Flash for nutrition tips

Prepared from the supplied Fit-Buddy project ZIP and team information. Technical claims are based on the inspected source code and README; no unsupported benchmark numbers are added.
