

Fit-Buddy

8. Scalability & Future Plan

Current Scope

The current version is suitable for local deployment with SQLite and a single FastAPI application.

Future Enhancements

- Move to PostgreSQL or another production database.
- Add authentication and role-based access.
- Add exercise images/video guidance.
- Add progress tracking, charts and history.
- Add mobile/PWA support.
- Introduce formal load testing and monitoring.
- Add richer safety checks and clinician-reviewed fitness guidance.

Prepared from the supplied Fit-Buddy project ZIP and team information. Technical claims are based on the inspected source code and README; no unsupported benchmark numbers are added.
