Project Name	Fit-Buddy
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout	[Information Required]	Indentation not explicitly documented.
2	Proper File Structure	Files and folders are logically organized	Yes	Routing, DB, schemas, AI, feedback, templates and tests are separated.
3	Meaningful Variable Names	Variables reflect their purpose clearly	[Information Required]	Naming quality not explicitly documented.
4	Function / Method Names	Functions are descriptively named	Yes	Generator, nutrition, update, CRUD and schema functions are named descriptively.
5	Code Comments	Inline and block comments explain logic	[Information Required]	Comments are not explicitly documented.
6	Modular Design	Code is split into reusable functions/modules	Yes	Dedicated modules and reusable components are documented.
7	No Redundant Code	Duplicate or unused code is removed	[Information Required]	Redundant-code status is not explicitly documented.
8	Error Handling	Exceptions and errors are handled gracefully	[Information Required]	Error-handling status is not explicitly documented.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Gemini generator functions	Python / Gemini	Workout generation	High

2	Nutrition tip generator	Python / Gemini Flash	Nutrition/recovery guidance	High
3	Plan update function	Python / Gemini	Feedback-based plan update	High
4	Database CRUD helpers	Python / SQLAlchemy	User and plan persistence	High
5	Pydantic schemas	Python / Pydantic	Input validation	Medium

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments	
Code Layout & Structure		[Information Required]	Modular structure is documented.
Readability		[Information Required]	Dedicated modules and reusable components are documented.
Reusability		[Information Required]	Reusable components and CRUD helpers are documented.
Documentation / Comments		[Information Required]	README and setup/testing instructions are documented.
Overall Score		[Information Required]	[Information Required]
