Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	[Information Required]
Programming Language(s)	Python, HTML, CSS, JavaScript
Framework(s) Used	FastAPI, Jinja2, SQLAlchemy, Pydantic
Key Features Implemented	7-day workout plan; nutrition/recovery; feedback update; SQLite persistence; Coach/Admin dashboard.
Pending / Incomplete Features	[Information Required]
Setup / Run Instructions	py -m uvicorn fitbuddy.app.main:app --reload --port 8000 API key/model configured through environment variables.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	[Information Required]
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	[Information Required]

Additional Notes / Comments:

Modular FastAPI routes, database helpers, Pydantic schemas, Gemini generators and Jinja2 templates. API keys are configured through environment variables. Repository URL: [Information Required].
