

## Performance Testing

|                      |                          |
|----------------------|--------------------------|
| <b>Date</b>          | 15 March 2026            |
| <b>Team ID</b>       | 6ab3ec17b5170a9b58b3a66b |
| <b>Project Name</b>  | Fit-Buddy                |
| <b>Maximum Marks</b> | 5 Marks                  |

### Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

#### Step 1: Testing Overview

| Field                      | Details                                |
|----------------------------|----------------------------------------|
| <b>Testing Tool Used</b>   | Python requests-based API testing      |
| <b>Type of Testing</b>     | API testing (local)                    |
| <b>Target Module / API</b> | /generate-workout and /submit-feedback |
| <b>Test Environment</b>    | Local                                  |
| <b>Test Date</b>           | [Information Required]                 |

#### Step 2: Test Scenarios

| S.No | Test Scenario / Description     | No. of Virtual Users   | Duration (sec)         | Expected Outcome                      |
|------|---------------------------------|------------------------|------------------------|---------------------------------------|
| 1    | Generate personalized workout   | [Information Required] | [Information Required] | Structured 7-day plan generated       |
| 2    | Submit workout feedback         | [Information Required] | [Information Required] | Updated plan generated from feedback  |
| 3    | Generate nutrition/recovery tip | [Information Required] | [Information Required] | Nutrition/recovery guidance generated |
| 4    | View stored users/plans         | [Information Required] | [Information Required] | Registered users and plans displayed  |

### Step 3: Performance Test Results

| S.No | Metric               | Target Value | Actual Value           | Status (Pass / Fail)   | Remarks                |
|------|----------------------|--------------|------------------------|------------------------|------------------------|
| 1    | Response Time (Avg)  | < 2 seconds  | [Information Required] | [Information Required] | [Information Required] |
| 2    | Response Time (Max)  | < 5 seconds  | [Information Required] | [Information Required] | [Information Required] |
| 3    | Throughput (Req/sec) |              | [Information Required] | [Information Required] | [Information Required] |
| 4    | Error Rate           | < 1%         | [Information Required] | [Information Required] | [Information Required] |
| 5    | CPU Utilization      | < 80%        | [Information Required] | [Information Required] | [Information Required] |
| 6    | Memory Utilization   | < 80%        | [Information Required] | [Information Required] | [Information Required] |

### Step 4: Observations & Analysis

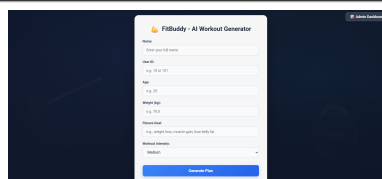

**Key Findings:**  
 [Information Required]

**Bottlenecks Identified:**  
 [Information Required]

**Optimization Steps Taken:**  
 [Information Required]

### Step 5: Screenshots / Evidence

Attach screenshots of your performance testing tool results below (e.g., JMeter report, Locust graphs, k6 output):

Evidence Screenshot 1 — FitBuddy main input page

Additional performance-test evidence: [Information Required]
